Welcome

TO THE 34TH ANNUAL

BAR S RANCH PRODUCTION SALE

Just when you think you have seen all Kansas weather has to offer, we get a warm December, a frigid blizzard in January followed by a thunder and rain storm in February. We are very thankful for the moisture after having very little for the past two years and we certainly hope you will appreciate muddy bulls.

Our program is undergoing a planned change. We are breeding the majority of our spring-calving cows later to calve when the weather is more predictable. This also reduces hay requirements for the cowherd. Many of these later-born bull calves will be held to sell as two-year-old bulls. This year will be a transition year giving you a range of age choices in the bulls offered.

Our genetic goals have not changed. Moderate, efficient Angus or Red Angus cows, balanced trait Angus or Red Angus bulls with an option of terminal cross hybrid vigor with Charolais. Be sure to check out the hand-picked open and bred registered heifers, and commercial open and bred heifers.

Thanks for coming,

Ken, Pat, David, Stephanie and Family

LIVE ONLINE BIDDING

www.cci.live

INSURANCE

Insurance will be available for your purchases on sale day.

HEALTH

All animals will be accompanied with interstate health papers. All bulls have undergone a complete Breeding Soundness Exam by James and Sam Rohleder, DVM, Hays, KS.

INSPECTION OF CATTLE

The bulls are being fed at Bar S Ranch and may be inspected there anytime. Please call ahead if possible.

PERFORMANCE INFORMATION

Complete EPD's are listed in the catalog. DNA profiles have been run on all bulls and their EPD's reflect results of these genomic profiles.

TRUCKING

We will assist with trucking arrangements. FREE DELIVERY IN KANSAS OF REGISTERED CATTLE. FREE BOARD ON BULLS UNTIL MID-APRIL.

DISCOUNTS

\$100/lot discount on REGISTERED cattle picked up sale day.
If you purchase 3 bulls, you receive a 3% discount.
If you purchase 4 bulls, you receive a 4% discount.
If you purchase 5 or more bulls, you receive a 5% discount.

TERMS AND CONDITIONS

Cattle sell under the standard terms and conditions suggested by the American Angus Association, the Red Angus Association of America, and the American International Charolais Association.

FIRST BREEDING SEASON GUARANTEE

Bulls selling for \$3,000 or more are guaranteed for the first breeding season against injury. Breeding season is defined as 90 days following turnout. If a satisfactory replacement isn't available, credit will be given on a future bull purchase minus salvage value.

It is certainly our privilege to welcome you all to the 34th Annual Production Sale at the Bar S Ranch in Paradise, KS. Ken Stielow will always be an industry icon and those of you who have done business with the man, go to church with the man, or have just had coffee with the man, know his level of passion for all things related to production and animal agriculture and the level of integrity he has maintained for his lifetime. It's a privilege to have the opportunity to do business with a family operation led by an individual who knows the value of people and relationships with those in agriculture. However, as most know, he doesn't go at it alone as his daughter, son-in-law, and their sons are involved very much so on a daily basis. The next generation is very no-nonsense, sound in their fundamentals, and sharp with the eye that sorts the stock to bring the offering as it is presented between the covers of this sale book.

The cattle that grace the pages and the pedigrees throughout this offering are products of low input management, low input genetics, and the phenotypic sort on hoof quality, skeletal integrity, fleshing ability, and above all else fertility and udder quality. The cattle that call the Bar S their home are bred to fit, acclimate, and adjust to a variety of climates and forage challenges. They are managed just like your commercial operation with limited and managed inputs and the mindset that margins matter. The stock represents years and generations of sorting those fundamentals and we believe this program to be one of the very best working cowherds the competitive state has to offer.

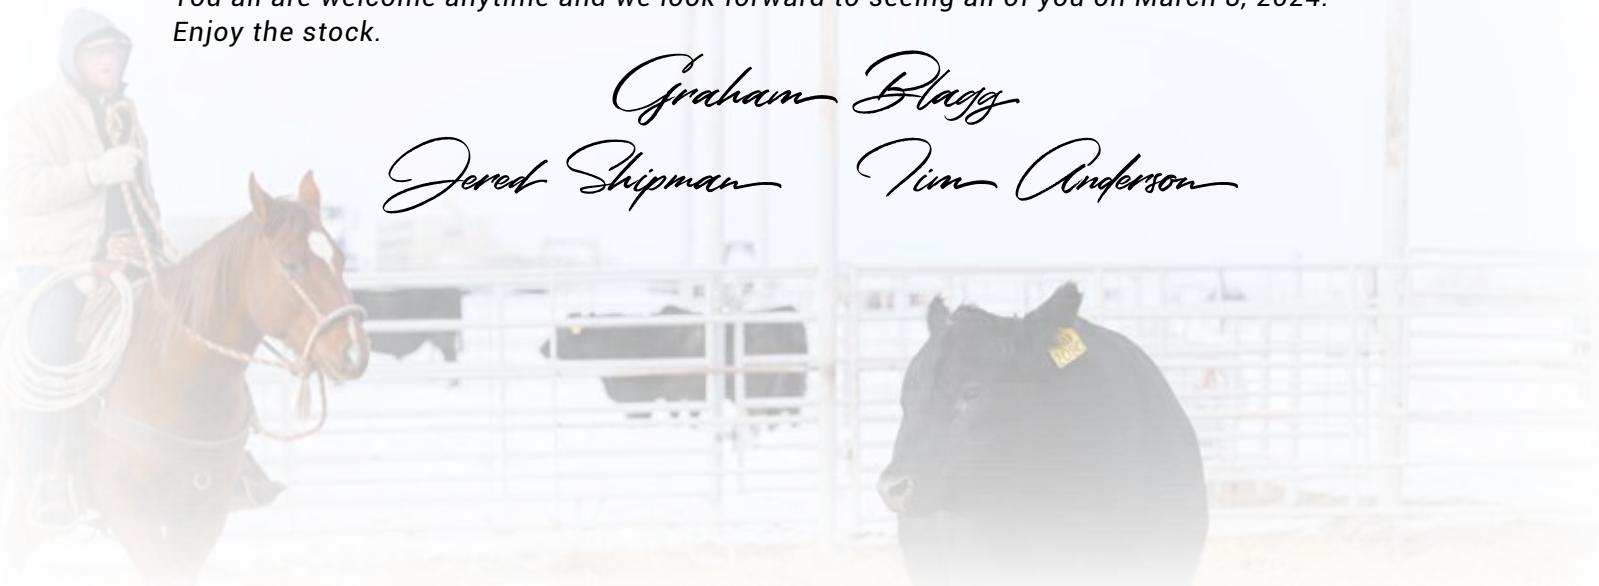

We know that you will find all three breeds to be sound structured, dense, genuine in their shape and kind, with the utmost skeletal correctness and integrity. They will chart high on the fundamentally important traits that enhance the commercial rancher's bottom line when they market the calves sired by the bulls in this sale book. Many of the cattle will be very excellent in terms of their balance of maternal, performance, and carcass traits with plenty of beef business shape and overall look and presence.

Margins have never been more important than right now. With higher input costs and a volatile marketplace, one has to take advantage on the upside in this ever-changing valuation process. One must invest in genetics that suit their respective environment and marketing goals to take the steps necessary in the right direction to remain profitable for the challenging years that are ahead of us on the national and international front. Investing in the good stock and the good team at Bar S will allow your program to capture the top of the market value for years to come as their ranching philosophy is much tougher than most commercial outfits in the region, so invest with confidence that same cattle that have bought the place and the genetics will do the very same for you. You all are welcome anytime and we look forward to seeing all of you on March 8, 2024. Enjoy the stock.

Graham Blagg

Fundamental Cowboy Logic runs deep in this proven pedigree! Cattle that are suitable for nearly any ranch climate, environment, and resources. This trio is a result of the aggressive embryo transfer program on the ranch with proof-positive genetics on both sides of the lineage. Bulls that are long-sided, big in their overall outline with WDA, scale, and capacity. The lead heifer in the 2024 Reserve Champion Pen of Three Heifers in Denver would be a full sister which seals the deal for investment consideration.

If you are in search of a sire that should have the ability to cover all the bases of basic ranching, set that satchel down and read up. The son of Sitz Barricade 632F is a trait leader for the traits that help all cattle remain in the program for years to come. This stud ranks in the top 2% for HP, the top 1% for Angle, the top 2% for Claw, while posting values in the top third for growth drivers as well. His dam is a very awesome female who is loaded with center body and brood cow merit!

We do admire the look and build of this Tehama Tahoe B767 son from a rookie dam sired by the influence of Stevenson Turning Point. This stud is certainly long, smooth, very attractive, and has the running gear for longevity. He is a significant index leader among the entire offering ranking in the top 5% for \$M, top 10% for \$W, top 15% for \$C, and for both Angus on Dairy values and top 25% \$G as well. For his expected performance values, he ranks in the top 15% for WW, top 20% YW with very sensible CED and BW combined with the outstanding top 10% for Claw and Angle as well. This stud has a great probability of working in higher altitudes and maintains carcass drivers that will keep your calves in the premium bound lines when harvested. Well-rounded and well-documented.

All the high-altitude outfits to the west should be paying attention to what this son of Baldridge Alternative E125 has to offer besides his top 4% value for PAP. He is without a doubt a prospect that should handle any heifer project with top 10% for CED and top 20% for BW with WW and YW expectations that keep him in the top half of the industry. He too qualifies for the CAB badge of approval with premium bound, end product expectations for the future calf crops that he will sire. He is also from one of the very best maternal granddams in the offering, Bar S Barbara 3142 with the influence of the proven Connealy Final Product.

A son of Baldridge Alternative E125 that dominates his contemporaries for overall presence and kind. He is a stout performance-oriented individual who is supported by a great and proven line of females who have played a major role in propelling the Bar S Ranch program to the status it holds today in the industry.

We are very impressed with the cattle by Baldridge Alternative E125. They come with the extras in terms of body and substance. Bar S Alternative 3120 is from another impressive daughter of Stevenson Turning Point who qualified for the CAB badge and should be one of the go-to heifer bulls on sale day as he is expected to stay in the top 4% of the business for CED. He too keeps his maintenance value high as he charts the top 10% for Claw, PAP, and HS thus telling us that he and his stock should thrive and minimize any issues in a multitude of climates and environments.

It's no secret to the followers of the Bar S program the influence that BC Alpha C1327 has had on the program over the past decade. The herd sire left the program a stellar set of momma cows that are leaders within the barbed wire fenced pastures of northern Russell County. Several direct sons and grandsons have influenced the really good customer cow herds throughout the land. Sons like Bar S C Bar L Alpha 3173 have trailed countless cows enhancing overall performance and productivity in the cattle that carry the influence of C1327.

We know for a fact that you will like this calf for the kind that he is and what he has to offer in terms of dressing up a set of feeder cattle with an enhanced look and beef industry shape with the CAB badge of premium potential to his record as well.

The cattle by the Patriarch, Bar S Range Boss 1118, continue to produce the stock that keeps all operations in the black. The dam of 2916 is one of the most powerfully built females on the ranch and she continues to generate the lead-off kind as one finds in this direct son of Sitz Barricade 632F. He's quite the prospect with top 15% WW, YW, and \$F with multiple other profit drivers in the top third of the industry.

Another bull with the same genetic resume that helps maintain ranch profitability. All problems generally stem from the surface and as this operation has evolved through the generations the herd has been sorted on feet, fertility, and udders. This "Barricade" son charts in the top 1\$ for Angle and top 2% for Claw with a \$M value that tells us that he will stamp a set of females with longevity and production merit.

Genetically, it's a broken record that keeps repeating a song worthy of listening. Sitz Barricade 632F on the Bar S Range Boss 1118 influence keeps the sound of profit easy on the ears. This dude is more than impressive as one studies his numeric advantages in comparison to his contemporaries. He's in the top 2% for \$M and \$W, with performance drivers in the top 10% for WW and top 25% for YW. His management and maternal values suggest his daughters will excel in fertility and longevity in production with the potential to raise and wean big calves. His dam would certainly be able to support all that has been mentioned with her own record of production.

This low birth son of Sitz Barricade 632F is another one of strong consideration for our friends in the mountainous regions of our great nation as he charts in the top 3% for PAP. What we admire most in this prospect is the proven and dominant influence of the legendary Krebs Ranch sire, Barstow Cash. The cattle by "Cash" have been well received over the past several years and his influence on the Angus breed and the commercial sector of the industry remains strong yet today. Invest with utmost confidence as his dam will justify any level of investment.

BC Alpha C1327 was bred in the Bill Conley program of Northwest Missouri so there is little to question about his cattle being able to withstand warmer climates with fescue forage, it's simply what they are bred to do and do very well. The Connealy Thunder-bred dam of this prospect is incredible in terms of her level of femininity, angularity, and build. She is one of the very productive females on the ranch who leaves nothing on the table when raising a calf and breeding right back.

As we initiate the two-year-old bull division we must say that this is the very best set of older bulls to be offered by the Bar S Family. The BC Alpha c1327 sire group has been an instrumental part of the breeding schematic for several years. C1327 left a productive and dominant set of momma cows that continue to raise and produce some of the very elite year after year regardless of sex. The program thought highly enough of this herd sire as a yearling that they retained him for use within the program. His build and kind fit the mold the program desires. He is from one of the many potent cow families the operation has to their record, and he is numbered as such to keep any program centered and profitable for the years ahead. Tie on to one backed with proven ranch acceptance.

If you study the program and this sale book, you should notice that nearly every time this genetic blend comes across a pedigree box, they will read low input, suitable calving merit, with a well-rounded management resume. The positive difference here is that he offers more REA with the potential for his cattle to put more pounds in the box and more dollars in your pocket. His maternal granddam is a Pathfinder as well.

A bull that comes with a big scrotal and \$EN values with calving and performance expectations that hold the industry standard. He will sire a set of feeder cattle that command top dollar, and you will be able to retain a set of females that will be loaded with milk and fertility. Buy with confidence as his maternal granddam was good enough to make a new home at Riverbend Ranch a few years ago.

The density and dimension this bull can offer to the invested program should prove significant when the first calves sell on video or your progressive livestock auction market of choice. Besides the Bar S program, this sire combines two of the Angus breed's best breeding programs that build cattle from the ground up with base width, center body, and beef business shape. He posts top-end dollar values with a 3% \$M and top 10% \$EN, the two that ultimately matter for the western range and shortgrass ranchers.

The ranch sold a maternal brother by HA Cowboy Up as the sale feature and high seller in 2020 to Nordlund Stock Farm of Minnesota. A pedigree that comes blessed with a pathfinder maternal granddam with the influence of Kesslers Frontman R001. He is another trait leader for \$M and \$EN in the top 10% of the breed with a top 25% \$W index as well.

Some of the nation's best Angus breeding programs have been built on the historic, fundamental selection principles and proven genetics of the Western Nebraska and Montana-based cattlemen and women. Outfits like Rollin Rock had as much to do with the groundwork for Express Ranches of Oklahoma and then the family operations of Sitz, Connealy, and Krebs continue to impact the business today. That is exactly what the Bar S program believes in as well as they etch their page in the ranching utility manual.

This is certainly one of the very best of the aged bulls in the entire offering! He is high quality with a ton of center body and muscle throughout. He is very impressive on the move with stellar running gear and industry integrity from end to end. He is suitable for use in any program setting, seedstock, or commercial, as we expect him to leave a set of calves that will raise the bar on multiple levels. Bar S used him the past year, so they will be the first to the punch, but he is for sale on March 8 and we do not expect it to be a problem for him to find a new outfit to employ him. He is one of the very best at the surface in the 2-year-old pen as indicated by his top 1% values for both Claw and Angle, he too ranks among the top 10% for SC, the top 20% for DMI, and the top 25% for WW. His pedigree touts a Pathfinder for a granddam as well further solidifying that he's worthy of ownership.

The cattle by Bar S Outlaw 9230 are very solid in terms of skeletal integrity and build. They are awesome footed, dense toed, deep in their heel, and loose-built with the ability to cover some country. 2091 happens to be from one of the ranch's favorite daughters of the BC Alpha c1327 that comes from a daughter of "Range Boss" with a textbook udder and the build and kind to withstand the tests and trials that the ranch has to offer through the years. This stud ranks in the top 2% for Angle, top 5% for Claw, top 10% \$EN, top 20% DMI and SC, with top 25% values for both Milk and \$M.

There is a whole bunch of consistency among the sons of "Outlaw" in terms of maternal values, intake, performance, and management. The cow herd is densely like-bred as well, and that's what generates the incentive to invest in the Bar S program. The dam is sired by the once-breed-leading BUBS Southern Charm AA31 and she is powerful in terms of upper hip and skeletal extension. This blend allows 2116 to chart in the top end for DMI, Claw, and Angle with one of the better advantages of the sire group at weaning.

This is the Bar S Range Boss 1118 son that the outfit chose to sample within the program as a yearling. This sire group has proven not only to be acclimated to the environment, climate, and western Kansas range, but they have thrived on fescue, east of I-135 as well. The influence of BC Alpha c1327 is also another supporting factor in the fescue tolerant/ adaptable

claim as well as the fact that he is a trait leader for HS in the top 4%. He will leave you a set of calves that should gather it up when sold at weaning with the reasonable top 30% value for WW and he ranks in the top 20% for SC and top 25% for MW too. He is from David's pick out of all the "Alpha" daughters on the ranch as well.

Another standout from the "Range Boss" sire group that comes with the impressive digits for multiple traits that can impact an operation's bottom line. He should be one suitable for the heat as he charts in the top 4% for HS. His cattle should convert and remain profitable as he comes with a top 10% value for \$EN. 2179 is also maternally driven posting a top 20% \$M value with top 15% CED, DMI, and HP to prove he's worthy of your time and investment.

Ken and David have done an outstanding job over the years making sure that the simple things were taken care of. Feet, udders, fertility, structure, and sorting the kind that require too much feed and pampering to withstand ranch life. They run this cow herd just as you do yours and possibly harder. Bulls like this son of Bar S Range Boss 1118 may not be the trendiest numerically or index-wise but he sure keeps the management values and input indicators where they need to be in his profile. He is from an excellent daughter of the S A V Final Answer 0035.

RED ANGUS YEARLING BULLS

LSF SRR TAKEOVER 5051C
Sire of Lots 90-92

BAR S LADY 7748
Dam of Lots
90 & 91

Lot 90

We think there is no better way to initiate this year's Red Angus offering than with these three flush mate brothers sired by LSF SRR Takeover 5051C (a.k.a. "Beartooth") and from the very proven resident donor dam, Bar S Lady 7748. 7748 is a time-tested, tried, and true daughter of the female maker, WEBR Night Train 324. All three are more than industry-acceptable and after genomics, the differences are revealed. However, they will still carry on the industry advantages of their sire group and should be acceptable for use on heifers or cows. They will each sire a set of feeder cattle that will command top-dollar and a set of females that will impact the industry with proven udder quality and fertility contributed from both sides of their genetic equation. Density, center body shape with significant surface area consumed, and skeletal integrity with a quality build can be found as you evaluate the individuals.

Lot 90 ranks in the top 20% for GM, the top 3% for Milk, the top 10% for YG, the top 13% for WW and REA, the top 14% for YW, and records in the top 17% for ADG.

Lot 91 charts in the top 1% for BW, top 3% for Milk, top 8% for CEM, top 9% for YG, and top 12% for Marb.

Lot 92 is top 1% HB and Stay, top 4% CEM, top 12% ProS and BW, and top 13% CED.

Another red-hided highlight with industry dominating potential and the arithmetic to prove it. This stud just has the look of quality and greatness. From his arrogant presence to his flawless structure to the sheer power in muscle and body that he has to contribute to any set of cows that he gets to trail. He is a direct son of the now deceased, \$190,000 KJL/CLAB Complete 7000E, and from one of the very best daughters of 9 Mile Franchise 6306. He ranks in the very top 1% for Marb with top 27% REA and a GM index in the top 11%. His calving merit is very worthy of noting as he ranks in the top 11% for CED, top 26% for BW, but let's not dismiss his value for siring females to be retained in the program as he charts top 12% for Milk and top 17% HPG.

This son of KJL/CLZB Complete 7000E is blood-red in color with big-time growth on board with the assist from his very good dam. SPUR Alfrida 2697F brings the big sappy calves to the weaning pen consistently each year. 3105 is loaded with true width, dimension, and substance and weaned off at nearly 700 to ratio 103. He ranks in the top 13% for WW, YW, and ADG with above breed average carcass, calving merit, and index values.

The efficiency and production merit of 3058's dam is like no other in the program as she weaned well over 50% of her body weight at weaning time which gained him the 102 ratio advantage with just shy of 700 pounds of weaning weight. He should sire cattle that will pound the scales and have the look that will gather premiums when market-ready as well. He charts in the top 10% for WW and YW with a top 15% value for ADG.

Here is the red-hided stud to get amped up about in the offering and has the credentials to support the claim. He's the kind any progressive seed stock operation and bull stud needs to study. Besides his great phenotype, he came to the weaning pen to record a 103 WWR, he too posts substantial EPD values for both WW and YW performance drivers in the top 4%. His contribution to any program is considered to be better than well-rounded with ProS and GM values in the top 3% of the industry supported with a top 4% value for Marb. Maternally he is balanced as well, between the quality of his dam and the sensible expectations on paper, the set of daughters he could leave behind should be beyond fantastic and profitable as well. Bar S Ranch has big expectations for what this bull can do for the business and the end product.

Biebert CL Stockmarket E119 has been one of the more popular sire groups in the breed for some time and rightfully so when they post the number profiles that they so often do. This E119 son comes from a Copper Lass influenced dam with the support of the proven HXC Conquest 4450P. He offers the big spread profile with maternal drivers suitable for heifer retention too. Top 7% ADG, top 8% YW, top 9% CED and BW with top 12% values on WW as well. Certainly, a top prospect with notable quality.

OW LEAD TIME 6294 PLD - Sire of Lot 112

As we initiate the Charolais offering, we strongly believe that many will be drawn to this powerful individual with ranch-worthy ratios, expected data, phenotype, and genetic merit. He is a true 74-pound birth weight bull that ratioed 105 at weaning time with over 680 pounds of weaning weight in the challenging ranch environment. He is without question one of the stoutest and burly featured one of the breed offering and possibly of the entire sale. He is huge at the surface with a dominating pen presence as he'll fill your vision with center body design, muscle shape, length, scale, and flexibility. He will sire a set of daughters worthy of retention as he ranks in the top 1% for SC, Udder, and Teat in harmony with a top 10% for REA, the top 15% for BW and WW. He is one of the very balanced white-hided studs to sell anywhere in the country in 2024, pay attention here.

The cattle by KEYS Powermax 57G have been incredible stock that offer industry balance across the board. This individual records a very modest birthweight of 76 pounds which contributed to his impressive 853-pound weaning weight that allowed him to ratio 104 among his contemporaries with a top 20% EPD value as well. His M6 Cool Rep 8108 inspired dam keeps him in the maternal light as daylights that record with top 5% for MTL and top 6% MTL in rare combination with a top 5% value for REA. This one should certainly raise the bar for any operation with progressive goals.

This is a full brother to lot 117 and 119, so one may as well keep them together to enhance the uniformity of your prospective calf crop. Both dominate the pen at weaning time as 2233 recorded 850 pounds of weaning weight. Consistency within the performance resume is documented as well as pounds of product that will be influenced in the box after his cattle are harvested. Obvious genetic consistency with industry-bound credentials.

Here is one of the very last opportunities to acquire a maternal brother to RFC Booger Sugar 12D. The 12D sire group has experienced much success through multiple marketing venues throughout the nation and we expect nothing less from this son of the high selling KEYS Powermax 57G. Bar S Powdered Up 2231 will enhance any set of cows that he trails with the necessities to capture premiums for the calves sired by him at harvest and should leave a set of daughters to make your neighbors jealous. Tie in on the goods when they are there for the taking.

As we get into the CCC WC Resource 417P sire group, we have a very solid place to start with three full brothers from the proven maternal influence of VCR Sir Duke 914 PLD and LT Wyoming Wind 4020 PLD. Their donor dam, RF Vanessa 489Z, has produced countless high sellers and winners for both the Ridder and Raasch Families of Missouri. These brutes all weaned off heavy and continued the same predictable path of performance to a year. They are balanced traits leading bulls that blend CE with WW in combination with top-notch maternal drivers and carcass as well. Certainly, true to the sire group in the scope of being well-rounded in what they have to contribute to any program. Another trio of age-advantage brothers from a proven matriarch that should enhance consistency and uniformity regarding phenotype and industry contribution.

BAR S PRIDE 4487 - Maternal Granddam of Lot 204

Here is one that is very cowy, deep, and functional from every angle. Her maternal great-granddam carries the Pathfinder title and was one of the top indexing cows of the program for her lifetime. Her direct dam by Musgrave 316 Stunner is proving her worth to the operation and as she matures they do expect big things from her.

ANGUS YEARLING HEIFERS

This attractively featured female is from a direct daughter of the program's impactful sire known as Bar S Range Boss 1118. The regular clients of the program know the quality and industry-improving attributes that the "Range Boss" cattle have to offer as far as industry advantages, especially when tied to balance and efficiency. Her direct sire needs no introduction to the sale offering as his influence throughout the book is rampant.

Here is one very stout-boned, big-footed female that has the body shape, genuine skeletal width, and balanced look with presence to take any program to the next level. This high-quality female is from the Bar S Pride 3723 dam that was a Reserve Division Champion at the 2015 National Junior Angus Show in Tulsa, Oklahoma that year. She's for serious stockmen only that should trend to be low input with breed leading values for DMI and \$EN.

BALDRIDGE ALTERNATIVE E125 - Sire of Lot 209

We love this female for what she has to offer from a balance, build, running gear, and pedigree standpoint. These Baldridge Alternative E125 daughters are proven to be very valuable and are more than qualified as calf raisers who will contribute to the industry tenfold.

3281 is gifted with the running gear, depth and body shape, and the look of a donor female.

ANGUS BRED HEIFERS

We very much so like the depth, volume, and overall capacity this daughter of the curve-bender Deer Valley Growth Fund has to offer the beef industry and the western ranching community. She is in the top 1% for WW and a top 2% leader for YW, and is in the top 4% for \$W.

The daughters of MSAR Ethan's Choice 8494 that have been retained in the program continue to exceed the goals that the operation sets for production measurements each year. We do not expect anything less from this maternally driven brood cow prospect that comes with the extras in terms of body, length, and look. Her Pathfinder-influenced dam is one of the very best Bar S Arsenal 6273 daughters on the ranch and definitely influences what this bred heifer has to offer to a program. She is in the top 10% for Milk, the top 15% for SC and \$W, top 20% for WW, Claw, Angle, and HS, with top 25% for YW as well.

COMMERCIAL HEIFERS

COMMERCIAL BRED HEIFERS

The commercial females are always a highly anticipated division at the annual Bar S Ranch Production Sale and this set stands up to the hype. They are sifted on the same strict principles of selection that fall upon the registered stock, with foot quality, longevity, and maternal quality at the paramount. They are carrying the service of sons with the influence of the senior herd sire BC Alpha C1327. They have undergone the same stringent vaccination protocols as you should expect from a trusted provider and all other herd health necessities are in top order. These females are built to acclimate and adjust to nearly any environment they are introduced to and will work as hard as any females that you have ever had on your place.

COMMERCIAL OPEN HEIFERS

BAR S RANCH

66 COMMERCIAL OPEN ANGUS HEIFERS

Sire identified commercial Angus heifers from the core of the commercial replacement group. The sires would include the bull battery of Bar S along with several A.I. sires as well like Sitz Barricade 632F, Baldrige Alternative E125, and others representing the finest of the Angus business. These heifers have had all their vaccinations per the ranch herd health protocol as well as OCV'd, dewormed, and poured. These females will come with the right to semen on any sire in the Bar S Inventory if the buyer wishes to take advantage of the ranch's heifer breeding option. Please contact David Dickerson for more details regarding this set of females and the breeding program option. (785)-483-1454

LUND FARM & RANCH

20 COMMERCIAL OPEN ANGUS HEIFERS

The Lund family has a reputation as a Top Shelf commercial operation that invests in the very best maternally driven Angus genetics. The outfit has been a long-time customer of Bar S Ranch, tying into the stout, big-centered stock consistently with the look and the great cow families. These females have been OCV'd and have had all vaccinations, with de-wormer and pour-on on board. These are always a sale feature. They are offering 20 elite commercial Angus females from the heart of the program. Please contact Jason Lund for more information regarding this set of open heifers. (785)-483-1827

HOBBS RANCH

10 COMMERCIAL OPEN ANGUS HEIFERS

The Hobbs Ranch has been in existence for over 125 years. They have always watched the bottom line and run a very tight ship with minimum inputs and management. The cattle have been sorted on those principles for decades and the quality of this set will indicate that fact. From a management standpoint, these females have been OCV'd, and are fully vaccinated, with de-wormer and pour-on on board. There are 10 head of these Open Commercial Angus heifers from Hobbs Ranch. For more details, please reach out to Terry at (785)-769-4639 or Wes at (785)-623-9576.

GENE THELEMAN

10 COMMERCIAL BRED ANGUS HEIFERS

These females would have originated from Lund Farm and Ranch and so they are reputation-bound to be the right kind to be implemented into anyone's program. They are bred to a proven calving ease BC Alpha C1327 son that was turned in on 6/1/23 and out on 9/1/23. They have been preg checked safe in calf. Please feel free to reach out to Clayton Theleman with any questions that you may have about this set of bred females at (785)-650-5094.
